

Lab Report Format for each questions:

- Cover
- Lab Question
- Introduction & Topic Theory
- Syntax and Format
- Code
- Output

Please complete following lab task and prepare lab report accordingly.(if possible please try hand written)

Lab 1

- 1) Write C# console program take input from user to print **Yourname** and print "Welcome **Yourname**, to dotnet technology".
- 2) Write C# console program that obtains three integer values from the user and display the sum.
- 3) Write a C# program to print your name and your address and email in a separate line take input from user.
- 4) Write a C# program to take input of principal, time and rate input from user and calculate simple interest.
- 5) Write a C# program to print the result of the specified operations- Take two input number and one operator from user.
- 6) Write a C# program to swap two numbers entered by users.
- 7) Write a C# program that takes a number as input and print its multiplication table.
- 8) How to reverse a string using a C# program?
- 9) Write a C# program to input number from user and find odd even accordingly.
- 10) Write a C# program to check whether an alphabet is vowel or consonant using switch statement.
- 11) Write a C# program to perform matrix multiplication using array input.
- 12) Write a C# program to input your .net technology marks into array and find min, max and average marks.
- 13) Write a program in C# to convert a string array to a string.

Lab 2

- 1) Write a C# program to create employee class with name, email and salary field, also create object for employee.
- 2) Write a C# program to access class method and fields of different namespace.
- 3) Write a C# program to demonstrate partial class.
- 4) Write a C# program to demonstrate different types of inheritance.
- 5) Write a C# program to create virtual method in C#.
- 6) Write a C# program to demonstrate different types of constructor.
- 7) Write a program in C# to overload unary operator.
- 8) Write a program in C\$ to binary operator.
- 9) Write a program to demonstrate different types of property in C#.

- 10) Write a class named 'Shape' having Length and Breadth properties along with default and parametrized constructor. The parametrized constructor should accept two inputs and initialize the properties of the class. Create new class rectangle from shape class and calculate area of rectangle.
- 11) Write a C# program to create generic class and methods.

Lab 3

- 1) Write a C# program to demonstrate example of multicast delegate.
- 2) Write a program to select employees whose salary is greater than 50000 and whose address is Kathmandu using LINQ.
- 3) Write a C# program to show insert and select operation in database.
- 4) Write a C# program to show edit and delete operation in database.
- 5) Write a C# program to demonstrate exception.
- 6) Write a C# program to define custom exception.
- 7) Write ASP.NET application to calculate simple interest.
- 8) Write an ASP.NET application to create registration form and validate.
- 9) Write C# program to demonstrate CRUD operating using database.
- 10) Write a C# program to save a tourism information in database. Assume you have a table 'Tour Destination' with columns Id, title, description, duration and CreatedDate.
